Wildlife Manager Report

Deer Permit Area (DPA) 241 is almost entirely private land and supports high deer densities, hunter numbers, and success rates. The area has excellent deer habitat, including patches of conifer and deciduous forest, wetlands, and riparian areas mixed with agriculture and old fields. Deer damage from localized high deer densities has been common through time, but recently the overall deer population has likely been below goal. The 2024 designation of a Two-deer limit again is meant to allow for some population growth, while providing hunters and landowners with tools to manage local deer numbers.
