\$3,000,000

1094.55 Acres

Raw Land

6608 148th Street

Cass Lake MN 56633

Status: Active

Description:

This massive once-in-a-lifetime property is something that even my dreams barely had the power and imagination to dream up! When it comes to what a property needs to grow trophy whitetails, this property has it all. Simply put, no corners were cut when setting up this property to develop and hold big bucks!! Having hunted nationwide for big whitetails, I've been on, hunted, and leased excellent large acreage properties. I can honestly say I'm not sure any of them were as quality from top to bottom on what this property offers. It's evident when going around this property for a day that the owner understands the land, wildlife management, and hunting and how they all work together, and the proof is in their success.

The land has miles and miles of well-maintained trails and approximately 60 acres of food plots. The owner has these food plots set up to the nines with enclosed redneck box stands, portable stands, and ladder stands to make sure they're able to hunt many of these locations smartly with various wind directions. There is also a pipeline running through the property from NW to SE and a powerline running from SW to NE, and both of these areas are set up with many food plots and redneck blinds. These areas are set up for anything from close-up archery opportunities to long-distance shooting, making a dream setup for the rifleman who enjoys long-range rifle setups and shooting. After several hours of driving around this property, we lost count of all the redneck box stands, ladder stands, and portable stands. The owner has approximately 90% or more of the fenced property borders and many gated access points around the perimeter, another key detail in hunting smart for mature whitetails. While driving around the property, we saw many deer and turkeys in the food plots, even at midday. We also saw a buck likely to fall into the 150" range standing on one of the trails ahead of us. As I said, there have been no corners cut. I truly believe anyone who sees this property and understands what it takes to do even one-tenth of this on a property would understand the cost and efforts put into building this hunting paradise.

The property is also top-notch regarding the "hunting shack" and buildings! The hunting shack in the SW area of the property has a beautiful gravel driveway and gated entrance. Pulling into the hunting shack site sits a fire pit with a deer pole to hang the harvest on colder days and enjoy retelling the harvest stories over a fire with the hunting crew. The cabin has a beautiful screen porch on the front and a lean-to in the back. Inside is the main living room kitchen area, the walls adorned with some truly impressive monster bucks they've harvested. As you head into the hallway, you will see a bunk room on each side. Then, past that is a mud room with personal cubby spaces for the hunters and a bathroom off to the side. Attached to the cabin is a beautiful game processing room. Behind the cabin is another shed with a walk-in cooler inside and another covered game-hanging area under the lean-to.

property are four buildings. The first building is a 48' x 48' airplane hangar with a 40' wide roll-up door, concrete floor, and floor drain. The second building is a beautiful 30' x 40' finished garage with heated floors and a propane-vented shop heater. The third building is a 50' x 64' machine shed to store all the other large equipment. The fourth building is a 30' x 30' pole building with a concrete floor. The fifth building is a 30' x 30' pole building with a concrete floor. The sixth building is a 30' x 30' pole building with a concrete floor. The seventh building is a 30' x 30' pole building with a concrete floor. The eighth building is a 30' x 30' pole building with a concrete floor. The ninth building is a 30' x 30' pole building with a concrete floor. The tenth building is a 30' x 30' pole building with a concrete floor. The eleventh building is a 30' x 30' pole building with a concrete floor. The twelfth building is a 30' x 30' pole building with a concrete floor. The thirteenth building is a 30' x 30' pole building with a concrete floor. The fourteenth building is a 30' x 30' pole building with a concrete floor. The fifteenth building is a 30' x 30' pole building with a concrete floor. The sixteenth building is a 30' x 30' pole building with a concrete floor. The seventeenth building is a 30' x 30' pole building with a concrete floor. The eighteenth building is a 30' x 30' pole building with a concrete floor. The nineteenth building is a 30' x 30' pole building with a concrete floor. The twentieth building is a 30' x 30' pole building with a concrete floor. The twenty-first building is a 30' x 30' pole building with a concrete floor. The twenty-second building is a 30' x 30' pole building with a concrete floor. The twenty-third building is a 30' x 30' pole building with a concrete floor. The twenty-fourth building is a 30' x 30' pole building with a concrete floor. The twenty-fifth building is a 30' x 30' pole building with a concrete floor. The twenty-sixth building is a 30' x 30' pole building with a concrete floor. The twenty-seventh building is a 30' x 30' pole building with a concrete floor. The twenty-eighth building is a 30' x 30' pole building with a concrete floor. The twenty-ninth building is a 30' x 30' pole building with a concrete floor. The thirtieth building is a 30' x 30' pole building with a concrete floor. The thirty-first building is a 30' x 30' pole building with a concrete floor. The thirty-second building is a 30' x 30' pole building with a concrete floor. The thirty-third building is a 30' x 30' pole building with a concrete floor. The thirty-fourth building is a 30' x 30' pole building with a concrete floor. The thirty-fifth building is a 30' x 30' pole building with a concrete floor. The thirty-sixth building is a 30' x 30' pole building with a concrete floor. The thirty-seventh building is a 30' x 30' pole building with a concrete floor. The thirty-eighth building is a 30' x 30' pole building with a concrete floor. The thirty-ninth building is a 30' x 30' pole building with a concrete floor. The fortieth building is a 30' x 30' pole building with a concrete floor. The forty-first building is a 30' x 30' pole building with a concrete floor. The forty-second building is a 30' x 30' pole building with a concrete floor. The forty-third building is a 30' x 30' pole building with a concrete floor. The forty-fourth building is a 30' x 30' pole building with a concrete floor. The forty-fifth building is a 30' x 30' pole building with a concrete floor. The forty-sixth building is a 30' x 30' pole building with a concrete floor. The forty-seventh building is a 30' x 30' pole building with a concrete floor. The forty-eighth building is a 30' x 30' pole building with a concrete floor. The forty-ninth building is a 30' x 30' pole building with a concrete floor. The fiftieth building is a 30' x 30' pole building with a concrete floor. The fifty-first building is a 30' x 30' pole building with a concrete floor. The fifty-second building is a 30' x 30' pole building with a concrete floor. The fifty-third building is a 30' x 30' pole building with a concrete floor. The fifty-fourth building is a 30' x 30' pole building with a concrete floor. The fifty-fifth building is a 30' x 30' pole building with a concrete floor. The fifty-sixth building is a 30' x 30' pole building with a concrete floor. The fifty-seventh building is a 30' x 30' pole building with a concrete floor. The fifty-eighth building is a 30' x 30' pole building with a concrete floor. The fifty-ninth building is a 30' x 30' pole building with a concrete floor. The sixtieth building is a 30' x 30' pole building with a concrete floor. The sixty-first building is a 30' x 30' pole building with a concrete floor. The sixty-second building is a 30' x 30' pole building with a concrete floor. The sixty-third building is a 30' x 30' pole building with a concrete floor. The sixty-fourth building is a 30' x 30' pole building with a concrete floor. The sixty-fifth building is a 30' x 30' pole building with a concrete floor. The sixty-sixth building is a 30' x 30' pole building with a concrete floor. The sixty-seventh building is a 30' x 30' pole building with a concrete floor. The sixty-eighth building is a 30' x 30' pole building with a concrete floor. The sixty-ninth building is a 30' x 30' pole building with a concrete floor. The seventieth building is a 30' x 30' pole building with a concrete floor. The seventy-first building is a 30' x 30' pole building with a concrete floor. The seventy-second building is a 30' x 30' pole building with a concrete floor. The seventy-third building is a 30' x 30' pole building with a concrete floor. The seventy-fourth building is a 30' x 30' pole building with a concrete floor. The seventy-fifth building is a 30' x 30' pole building with a concrete floor. The seventy-sixth building is a 30' x 30' pole building with a concrete floor. The seventy-seventh building is a 30' x 30' pole building with a concrete floor. The seventy-eighth building is a 30' x 30' pole building with a concrete floor. The seventy-ninth building is a 30' x 30' pole building with a concrete floor. The eightieth building is a 30' x 30' pole building with a concrete floor. The eighty-first building is a 30' x 30' pole building with a concrete floor. The eighty-second building is a 30' x 30' pole building with a concrete floor. The eighty-third building is a 30' x 30' pole building with a concrete floor. The eighty-fourth building is a 30' x 30' pole building with a concrete floor. The eighty-fifth building is a 30' x 30' pole building with a concrete floor. The eighty-sixth building is a 30' x 30' pole building with a concrete floor. The eighty-seventh building is a 30' x 30' pole building with a concrete floor. The eighty-eighth building is a 30' x 30' pole building with a concrete floor. The eighty-ninth building is a 30' x 30' pole building with a concrete floor. The ninetieth building is a 30' x 30' pole building with a concrete floor. The ninety-first building is a 30' x 30' pole building with a concrete floor. The ninety-second building is a 30' x 30' pole building with a concrete floor. The ninety-third building is a 30' x 30' pole building with a concrete floor. The ninety-fourth building is a 30' x 30' pole building with a concrete floor. The ninety-fifth building is a 30' x 30' pole building with a concrete floor. The ninety-sixth building is a 30' x 30' pole building with a concrete floor. The ninety-seventh building is a 30' x 30' pole building with a concrete floor. The ninety-eighth building is a 30' x 30' pole building with a concrete floor. The ninety-ninth building is a 30' x 30' pole building with a concrete floor. The one hundredth building is a 30' x 30' pole building with a concrete floor.

Also, one should note that this property's location is so close to some top estate hunting areas!

Additional acreage with a beautiful home and a pole building is possibly available.

If this sounds like a property you've also been dreaming about, I can assure you it is worth the look. This is a once in a
