Verndale MN 56481

Status: Active

**Description:**

Discover a truly unique property located just east of Wadena and north of Verndale, offering an incredible blend of farming and recreational opportunities. This multi-use land is currently being farmed and utilized for hunting, but its potential extends far beyond. 39.5± FSA tillable acres in a productive bean/corn rotation, the property features lighter sandy soil ideal for irrigation or potential enrollment in CRP or CREP programs. The crops enhance the hunting experience by providing vital food sources for local wildlife. The diverse landscape includes mature woods filled with mature oaks, aspen, and ash, complemented by thick bedding areas of cattails, willows, and tamarack. This rich habitat attracts a variety of wildlife, including deer, turkey, grouse, and even the occasional bear and pheasant, making it a top-end hunting property. In addition to its agricultural and recreational uses, this property presents an excellent opportunity for a stunning home site. With ample space to hunt right from your backyard, start a hobby farm, or raise livestock, you can create your ideal rural lifestyle. This diverse property offers endless possibilities, whether you're looking to invest, establish a homestead, or enjoy outdoor adventures. Don't miss out on the chance to own what I consider a great property in a great area!
